**A STUDY OF MEDICINES DERIVED FROM ORGANIC AYURVEDIC
MEDICINE**

ANJALI YADAV

Research Scholar, Ph. D in Chemistry,
Dr. A.P.J. Abdul Kalam University, Indore, M.P.

ABSTRACT

In this study, the growth in popularity of Ayurvedic medicine throughout the world is investigated, with a particular focus on the holistic approach and the use of natural components. Through an exhaustive analysis of the relevant literature, it explores the effectiveness, safety, and contemporary uses of organic Ayurvedic treatments. The origins, philosophical basis, pharmacological effects, and safety records of these treatments are some of the key areas of concentration with regard to investigation. Moreover, it investigates the incorporation of modern healthcare systems, taking into consideration the viewpoints of practitioners, clinical professionals, and regulatory authorities. In general, the study emphasizes the potential of organic Ayurvedic medicines to improve health and stresses the need of more research, clinical trials, and policy measures to fully harness the advantages of these medicines.

Keywords: Organic Ingredients, Natural Remedies, Holistic Healthcare, Safety, Efficacy, Origins, Pharmacological Effects, Safety Records, Clinical Standards
