Research Scholar, Department of Psychology,
Mansarovar Global University, Bilkisganj, Madhya Pradesh.

ABSTRACT

People love their smartphones for all the useful apps they can run on them. Smartphones have greatly simplified interpersonal interactions. There are several ways in which people gain from their regular labour. Smartphones facilitate better communication, give users with more opportunities to learn, expose them to more information and ideas, help them grow as individuals, make it easier to utilise applications, help them improve professionally and personally, and more.
